Forecast for Sunday 11 Jul 2021

Weather: A cloudy day in general, but this bringing misty conditions to summits and higher slopes through the early part of the morning. The odd spell of drizzle is also possible through the morning. More noticeable patchy rain moving across the park over the course of late afternoon and into the early evening.

Chance of cloud free mountain/hill tops above 800m: 40% in the morning, rising to 70% in the afternoon.

Visibility: Cloud through the early hours dropping to 350-450m, bringing poor visibility to summits and higher slopes. The cloud will lift over the course of the morning to above the summits, allowing generally good visibility of surrounding hills through the afternoon. Visibility temporarily dropping in any light rain, which may also bring cloud bases down to 700m.

Meteorologist's View

Although the day may be grey and cloudy, it is still important to stay hydrated when walking on the hills.

Forecast for Monday 12 Jul 2021

Weather: A cloudy start to Monday with further patches of light rain possible through the early morning. Showers developing from late morning onward, which will be frequently heavy and bring the risk of hail and thunder. Cloud breaking up through the afternoon, allowing some brighter spells to develop in between the showers. The showers will fade away into the evening and night.

Maximum wind: Winds on the summits initially southeasterly 5mph, transitioning to northwesterly 10mph from late morning onward.

Chance of cloud free mountain/hill tops above 800m: 60% through the morning, rising to 90% in the afternoon.

Visibility: Cloud predominantly above the summits throughout Monday. However, scattered amounts falling to 500-600m through the morning, bringing temporary reductions in visibility for higher summits. Visibility also dropping temporarily in any showers, and being very poor in heavy showers.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 19 Celsius.
At 800m: Plus 10 Celsius.
Freezing level: Above the summits.
